

EMC-300 EMC Legato NetWorker Administration

Course Length: 3 days

Overview

This instructor-led course explores EMC NetWorker installation, configuration, maintenance, management, backup and recovery. The course contains lectures, instructor demonstrations, review questions and hands-on labs to provide practice in both UNIX and Windows environments.

Audience

This course is intended for system administrators, partners, and software support specialists who install, configure, and support EMC NetWorker in UNIX and Windows environments. To understand the content and successfully complete this course, a student must have a suitable knowledgebase/skill set. The student must have an understanding of

- Backup and recovery concepts and principles
- UNIX or Windows system administration
- Network administration in a TCP/IP environment
- SCSI device configuration, cabling, and addressing

A list of specific prerequisite courses can be found in EMC Education Services Learning Management System.

Course Objectives

Upon successful completion of this course, participants should be able to:

- Install NetWorker and NetWorker Management Console
- Perform backups
- Customize backups
- Manage NetWorker media
- Configure and manage libraries
- Configure and manage standalone devices
- Manage NetWorker databases
- Perform cloning and staging of save sets
- Administer the NetWorker server
- Administer the NetWorker Management Console server and generate reports
- Perform data recoveries

Modules

These modules are designed to support the course objectives. The following modules are included in this course:

- EMC NetWorker Overview
- Installing NetWorker and NetWorker Management Console
- NetWorker Resources and Administrative Interfaces
- Performing Backups
- Customizing the Backup Environment
- NetWorker Media Management
- Configuring and Managing Autochangers
- Configuring and Managing Standalone Devices
- NetWorker Database Management
- Performing Cloning and Staging
- Administering the NetWorker Server
- NetWorker Recovery Overview
- Performing a Browsable Recovery
- Performing a Save Set Recovery
- Recovering a NetWorker Server
